

INNOVPROCURE

“Bridging Government Needs with Startup Innovation”

Great innovations often exist , but the right opportunities don't always find them.

InnovProcure bridges this gap by connecting government challenges with startup-driven solutions.

From discovering the right ideas to enabling real-world pilots, we turn innovation into impact.

Startup-Friendly Public Procurement

From Innovation to Implementation

Government departments struggle to efficiently **identify, evaluate, pilot, procure,** and **scale** innovative solutions developed by eligible startups.

 Key Problems

Fragmented Discovery

Innovative startups and relevant government needs are difficult to connect.

Complex Procurement

Traditional procurement processes can be difficult for early-stage startups to navigate.

Limited Piloting

Lack of a structured mechanism to test solutions before large-scale adoption.

Evaluation Gaps

No unified framework for comparing innovation, feasibility, impact, and technical capability.

Scalability Barrier

Successful pilot solutions often lack a clear pathway toward procurement and wider deployment.

Issue Resolution

Problems during implementation may lack a transparent system for reporting, tracking, and resolving issues.

Core Challenge

How can we create a **transparent, startup-friendly mechanism** that enables government departments to move from

Need

Discover

Evaluate

Pilot

Procure

Scale

while ensuring efficient **issue reporting** and **resolution**?

“Bridging the gap between **government challenges** and **startup innovation**.”

InnovProcure

From Government Problem to Proven Startup Solution

Discover . Evaluate . Pilot . Procure . Scale

Proposed Solution – InnovProcure

Aunified digitalplatformenablingGovernmentDepartments to discover, evaluate, pilot and procure innovative startup solutions through a transparent and outcome-driven workflow.

Detailed Explanation

- Outcome-based Challenges – requirements, KPIs & criteria
- Startup Discovery – registration, challenge matching & proposals
- End-to-End Workflow – Screening → Evaluation → Pilot → Procurement → Scale
- Pilot Management – milestones, KPIs, timelines & payments
- Transparency – role-based dashboards, notifications & audit trails
- AI Matching – intelligent startup–challenge recommendations.

How it Addresses the Problem

- Standardizes government innovation challenges
- Simplifies startup discovery & evaluation
- Enables controlled, KPI-driven pilots
- Tracks milestones & payments
- Provides evidence-based procurement decisions
- Supports replication & scale-up

Innovation & Uniqueness

- End-to-End Innovation Procurement
- Outcome + KPI-Based Evaluation
- Pilot Before Large-Scale Procurement
- Multi-Role & Transparent Workflow
- AI-Assisted Startup–Problem Matching
- Audit-Ready & Scalable Architecture

TECHNICAL APPROACH

Technology Stack

Implementation methodology

System Architecture

User Roles

Core Features

FEASIBILITY AND VIABILITY

Feasibility

Technologies

React.js , node.js/Express,
PostgreSQL, REST APIs,JWT/RBAC

Modular Architecture

Easy integration with startup
databases& evaluators

Scalable & Flexible

Supports multiple
departments,startup & evaluators

MVP - Ready

Core challenge -to- procurement
workflow can be deployed
incrementally

Challenges & Risks

Government adoption
&process integration

Data privacy, cybersecurity
& IP protection

Startup eligibility and
solution verification

resistance to changing
conventional procurement
practices

complexity of inter
departmental scaling

Migration strategies

Standardised templets evaluation
criteria & workflows

RBAC, audit logs & secure
data handling

Multi-stage screening
+
expert evaluation

Pilot-first approach before
large-scale procurement

KPI-based validation for
evidence-driven decisions

Phased rollout across
departments/districts

Viability

Cost Efficient

Uses existing infrastructure & open-source
tools Reduces implementation costs.

Time Feasible

MVP can be developed in 3-6 months.
Phased rollout ensures quick deployment.

User Adoption

Simple interface for officials & citizens.
Easy training ensures smooth
adoption.

Long term sustainability

Scalable and policy-aligned solution.
Regular updates ensure long-term impact.

IMPACTS AND BENEFITS

Potential Impact on the Target Audience

InnovProcure creates value for all key stakeholders in the public procurement ecosystem – Government Departments, Startups and Citizens.

Government Departments

Faster discovery of relevant startups (less time, more options)
Structured evaluation and pilot testing (reduced uncertainty)
Reduced procurement risk (through careful screening and pilots)
Evidence-based decisions (data and performance insights)
Improved public service delivery (better solutions for citizens)

Startups

Better visibility and access to government opportunities (one platform, multiple departments)
Fairer evaluation (transparency and equal opportunity)
Easier pilot-to-procurement pathway (from testing to long-term contracts)
Faster feedback and market validation (learn, improve, grow)

Citizens / Public

Better innovative public services (smart, efficient, future-ready)
Quicker problem-solving (faster deployment of proven solutions)
Improved quality and transparency (visible process, accountable outcomes)

In short, InnovProcure builds a more transparent, efficient and inclusive procurement ecosystem for everyone.

Benefits of the Solution

InnovProcure delivers value across social, economic, environmental and governance dimensions, creating a more innovative, efficient and sustainable public procurement ecosystem.

Social

- Improved public services (health, education, infrastructure, etc.)
- Inclusive access to innovation (for startups and regions)
- Stronger startup-government collaboration (long-term partnerships)

Economic

- Reduced procurement inefficiency (less time, lower costs)
- Faster market access for startups (visibility and opportunities)
- Support for local innovation and jobs (entrepreneurship and employments)
- Scalable solutions (wider adoption across departments)

Environmental

- Green solutions for a sustainable future
- Supports green and sustainable solutions (climate and resource friendly)
- Digital workflows reduce paper use (lower carbon footprint)
- Encourages efficient resource use (better planning and long-term impact)

Governance & Technology

- Transparent, accountable, future-ready
- Transparent and standardized workflow (fair and consistent process)
- Traceable evaluations (accountability and trust)
- Data-driven procurement (bett5^{er} insights and planning)
- Easier scaling across departments

RESEARCH AND REFERENCES

RESEARCH GAP: Existing initiatives support startup procurement, but InnovProcure unifies the complete innovation-procurement lifestyle.

Government of India — GeM and startup procurement statistics.
[Reference](#)

RESEARCH CONCLUSION
The opportunity is not to replace GeM — it is to build the missing innovation layer before and around procurement.
